

REUSABLE INFRASTRUCTURE · FOR FILM & TV

# Full wash-up and **reusable** tableware infrastructure for film & TV productions

We help film and TV productions replace single-use packaging with a practical on-set wash-up trailer and reusable plate, bowl and cutlery system built for production environments.

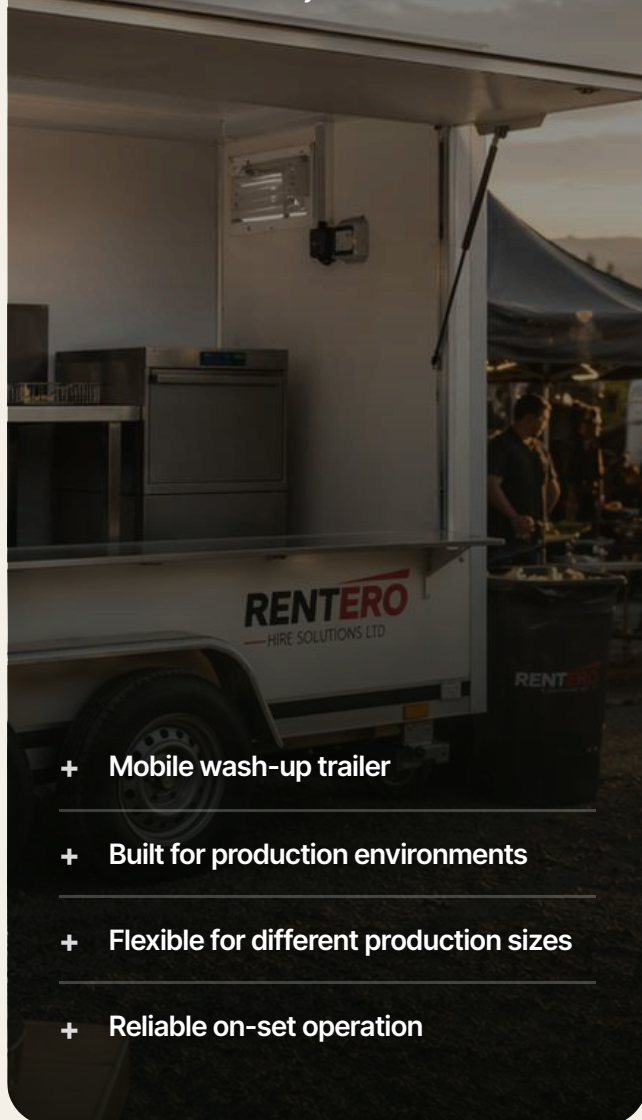

***More than a trailer rental.***

# Two flexible production setups

Our modular wash-up solutions are designed to scale with your production. Whether you need a standalone wash-up trailer or a fully managed reusable tableware system, we provide reliable, on-set infrastructure that reduces waste without slowing down your workflow. Built for demanding production environments, both setups integrate seamlessly into existing catering operations.

## Wash-up trailer only

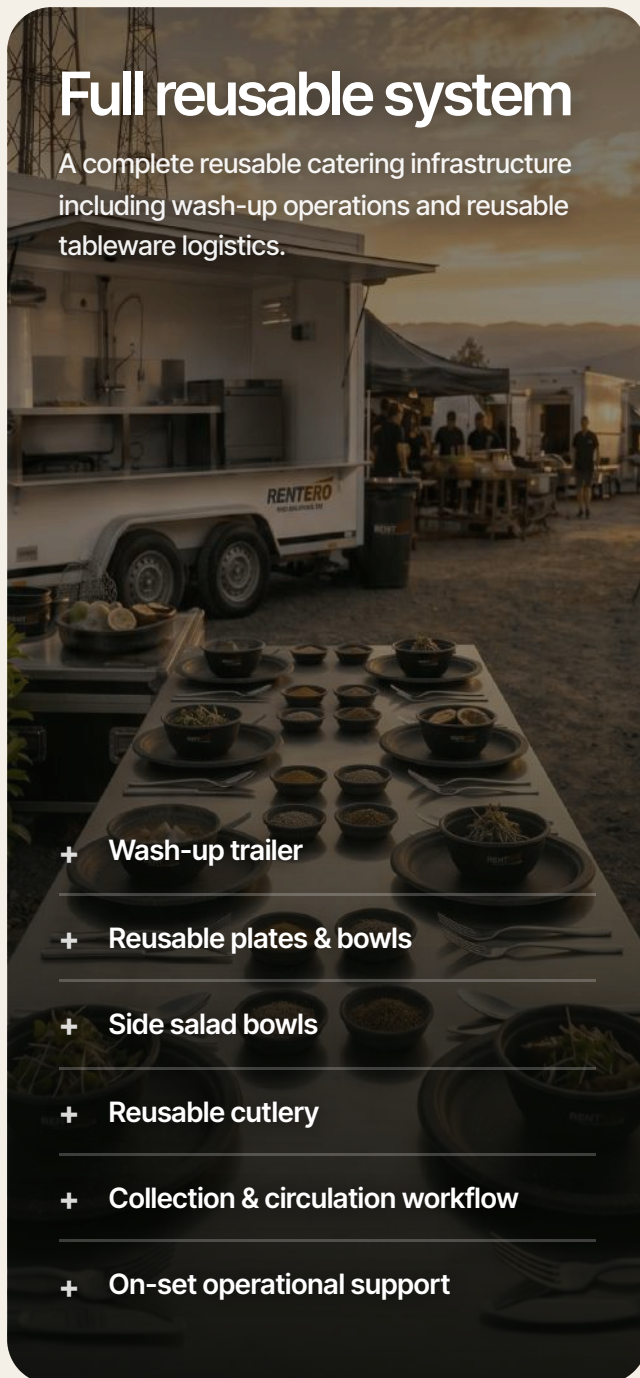

A standalone on-set wash-up solution for productions that already operate their own reusable tableware system.

- + Mobile wash-up trailer
- + Built for production environments
- + Flexible for different production sizes
- + Reliable on-set operation

## Full reusable system

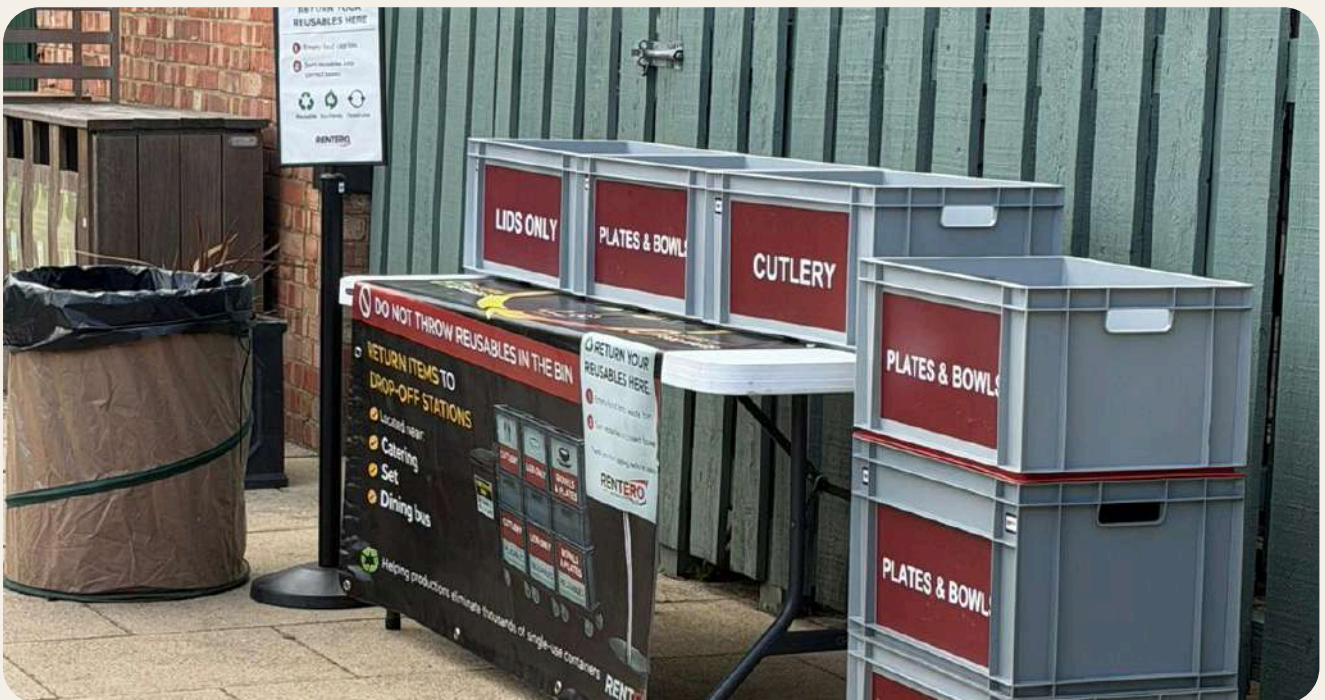

A complete reusable catering infrastructure including wash-up operations and reusable tableware logistics.

- + Wash-up trailer
- + Reusable plates & bowls
- + Side salad bowls
- + Reusable cutlery
- + Collection & circulation workflow
- + On-set operational support

# Simple operational flow for busy productions

Four steps, repeated through every production day. We deliver, your crew uses reusables, and we handle the wash-up — keeping catering logistics smooth from start to wrap.

## 1. Delivery & setup

We deliver the wash-up trailer and reusable system directly to the production location.

## 2. On-set use

Crew members use reusable plates, bowls and cutlery throughout production catering operations.

## 3. Collection & wash-up

Used tableware is collected, washed and returned into circulation through the on-site wash-up system.

## 4. Continuous reusable cycle

The system operates throughout production to reduce disposable waste and maintain smooth catering logistics.

# More than a trailer rental

Rentero is a full-service reusable infrastructure built specifically for film productions — not just a trailer rental, but a complete wash-up and reusable tableware system designed for real production environments. Practical, scalable and production-ready, the system helps reduce single-use packaging and waste while keeping on-set catering operations efficient and seamless.

Single-use items replaced

# Less waste. Cleaner sets. *Real numbers.*

Productions that switch from single-use packaging to our reusable system typically see a 60–80% reduction in disposable hot-meal packaging — alongside fewer waste collections, fewer supplier vehicles on site, and simpler reporting against studio sustainability targets.

## SINGLE-USE CATERING

### Disposable packaging, every meal.

- ✗ Plates, lids and cutlery binned within minutes
- ✗ Daily skips, multiple waste collections
- ✗ Packaging costs spread across the schedule
- ✗ Visible waste on set — hard to report against

## RENTERO SOLUTION

### Reusable system, on-site washing.

- ✓ Items washed, sanitised and reissued in trailer
- ✓ Fewer collections, less vehicle movement
- ✓ Single supplier, one quote, one process
- ✓ Clear story for sustainability reporting

# 60– 80%

TYPICAL REDUCTION IN  
HOT-MEAL PACKAGING WASTE

### Production-by-production impact reporting — coming soon.

We are building per-shoot impact reports: waste avoided, packaging units replaced, collections removed. Numbers will be published as the data becomes available.

# From the set

Working photography from current and recent productions — the trailer, the reusables, the drop-off stations, and the system in real conditions.

READY WHEN YOU ARE

# Tell us about your production. We'll size the system *to fit*.

Send your location, dates, estimated crew size and preferred service level — trailer only or full reusable system. We'll come back with a tailored proposal and a clear quote.

## REQUEST A QUOTATION

- Production / company name
- Location & shooting dates
- Estimated crew size
- Trailer only or full reusable system
- Single or multi-stage setup
